

AUDIT PLUS+

ENHANCING *Energy* AUDITS

The Audit Plus Project is offering free of cost integral energy efficiency consultancy service vouchers to Energy Intensive Industries (EII) to guide through energy efficiency measures implementation that will offer several energy and non-energy benefits

AUDIT
PLUS+

The Audit Plus Project service will be offered by the project's consortium members who are leading organizations with expertise in energy efficiency and decarbonization of energy systems.

Audit Plus will act as one stop shop solution for EIs and will offer structured support related to the following services:

- Technology assessment
- Cost benefit analysis
- Engineering support
- Identification of public and private financing support
- Matchmaking with technology/service providers
- Guidance for implementing energy audit plans
- Developing corporate energy strategies

The Audit Plus integral consultancy service will be tailored to the needs of participating EIs. The following activities will be performed:

- Setting baseline and identifying the most appropriate energy efficiency measures
- Creating implementation plan for suggested energy efficiency measures
- Advising available technical and financial support to suit the needs of EIs
- Help creating energy culture and bringing behavioural changes within the participating organisations.
- Short training with practical approach to enable participating EIs using best tools to implement ECMs
- Putting in contact with most suitable energy technology/service providers to continue energy efficiency journey to achieve energy and carbon saving targets

Moreover, the EIs will be provided with an exclusive access to Audit Plus Knowledge Hub, where they will have access to:

- Good practices white book for energy audits
- Dedicated training materials and webinars
- Compilation of available tools for calculating energy and cost savings
- Success stories of implementing energy efficiency measures
- Relevant energy efficiency KPIs to assess energy and cost savings

The energy efficiency consultancy service voucher will guide EIs through several energy and cost saving opportunities in various energy systems and industrial processes including but not limited to:

- Heating, Ventilation and Air Conditioning Systems
- Motors and Drives
- Renewables energy generation
- Lighting
- Building envelope
- Process heating and cooling (heat/cold generation, heat/cold transfer, heat/cold storage, heat recovery)
- Compressed air system
- Cogeneration and Trigeneration
- Steam generation and distribution system
